Junior Backend Developer with six months of internship experience at Zennaxx Technology, which includes working with Node.js backend development and REST API development. Skills in JavaScript, Express.js, PostgreSQL, Prisma ORM, MongoDB, Redis. I am also familiar with different aspects of automated testing using Jest, usage of Docker containerization, and CI/CD pipelines for application deployment.

WORK EXPERIENCE

Zennaxx Technology • Rajkot • 04/2026 - 10/2026

Node.js Intern • Internship

- Developed and worked on backend applications using JavaScript, Node.js, and Express.js.
- Worked with PostgreSQL, Prisma ORM, MongoDB, and Redis for database operations and backend functionality.
- Implemented and worked with REST APIs, authentication, authorization, and API security.
- Used Jest for automated testing and worked with Docker-based containerization and CI/CD workflows.
- Gained practical experience in application deployment, real-time systems, and backend application architecture.
- Worked on backend development projects involving database integration, API design, testing, and deployment.

EDUCATION

Master of Computer Applications (MCA) in IT

Marwadi University • Gujarat • 07/2023 - 04/2025

Bachelor of Computer Applications in IT

R.P Bhalodiya • Rajkot • 05/2020 - 03/2023

PROJECTS

Secure Authentication & Authorization System

- Developed backend authentication functionality using password hashing and token-based authentication.
- Worked with authorization mechanisms and role-based access control.
- Organized backend functionality into modular components for maintainability.
- Addressed authentication and API security requirements.

E-Commerce Backend API

- Developed REST API functionality for e-commerce resources and CRUD operations.
- Implemented request validation and structured error handling.
- Integrated database models with backend API endpoints.
- Applied modular backend development practices to organize application functionality.

Collaborative Workspace Application

- Developed backend functionality for workspace and document-related operations.
- Used PostgreSQL and Prisma ORM for relational database management.
- Worked with real-time communication features for collaborative application functionality.
- Structured backend components to support maintainability and future feature development.

SKILLS

Programming: JavaScript, SQL

Backend Development: CRUD Operations, Express.js, Middleware, Node.js, REST APIs

Databases & ORM: MongoDB, Mongoose, PostgreSQL, Prisma ORM

Authentication & Security: JWT, Password Hashing, Role-Based Access Control (RBAC)

Caching & Real-Time Systems: Real-Time Communication, Redis, Socket.IO

Testing & DevOps: Application Deployment, CI/CD, Docker, Jest

Development Tools: Git, GitHub, npm, Postman
